PETERSHAM 2049

Requested By: Mr T COPE

Copies to:

X-RAY LEFT KNEE, X-RAY RIGHT KNEE

Service – Friday, 09 February 2024

History: Bilateral knee pain ? quadriceps tendinitis. ? patellar cartilage.

BILATERAL KNEE XRAY

There is no large bony osteophyte.
No fracture or dislocation seen.
There is possible small right suprapatellar effusion.

If clinically suspicious for meniscal or ligament injury, this can be investigated with MRI.

Yours sincerely,

Dr. Frankie H. Wong
